# Write sentences

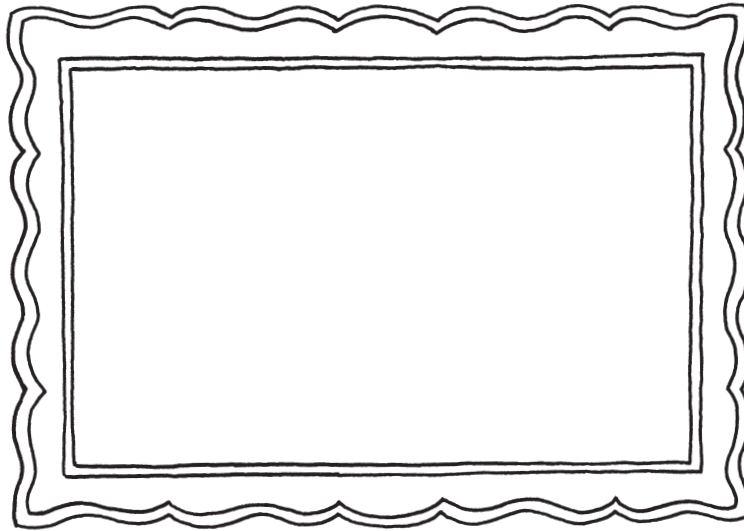

Copy the words below. Leave a finger space between each word. Draw a picture of yourself in the frame.

This is me.

This is me.

This is a monster.

This is a monster.

In this activity, your child can practice copying some whole words put together in short sentences. Talk about the letter shapes and point out how letters are put together in groups to make words. When copying words, it is important to leave a space in between them. Ask your child to place a finger from the nonwriting hand at the end of each word. He or she can then start to write the next word after the finger, creating an adequate space between words.
