

Sorting the toys

Look at the toys in the circles.
Match the other toys to the right circle.

Parent's Notes

For this activity, there are two set rings, one with wheeled toys and the other with toys without wheels. Talk to your child about the toys in the sets. What do they notice?

They are all toys, but what is the difference between the two sets? What is the same about the toys in each set?

After you have talked about what your child notices, encourage them to do the sorting. An example is given for each set.
