Answers may vary

This page features picture scene that include many familiar objects beginning with specific letter sounds. Your child should find and name as many objects as possible for each of the listed letters, count them up and then write the total number in the box. Your child can also include abstract words, such as under or wet, if he or she wishes. To help with counting, either keep a tally for your child or write the first letters lightly on the objects as they are found. This activity will be easier to tackle if your child completes the counting task before coloring the picture.
