

Adding coins

Use three coins each time. How many different totals can you make?

$$\boxed{10c} + \boxed{c} + \boxed{c} = \boxed{12c}$$

$$(25c) + (5c) + (1c) = 31c$$

Adding coins

Use three coins each time. How many different totals can you make?

$$\boxed{00}$$
 + $\boxed{0}$ + $\boxed{0}$ = $\boxed{120}$

$$(25c)$$
 + $(5c)$ + $(1c)$ = $(31c)$

Suggested totals only.

$$25¢ + (|¢|) + (|¢|) = 27¢$$

$$\boxed{ |c| + |c| +$$

$$\boxed{10¢} + \boxed{10¢} + \boxed{10¢} = 30¢$$

Encourage children to keep track of the different combinations of coins that they use. In this way, they can avoid repeating combinations.
